Auditorium Seating

- A.1.1.** The chair frame is made of wood and upholstered with polyurethane.
- A.1.2.** The seat is tilting and is equipped with a high-strength tilting mechanism, ensuring smooth and silent operation. The seat dimensions comply with ergonomic requirements.
- A.1.3.** The backrest is ergonomically designed and provides adequate lumbar support to the user. It is manufactured from 18 mm thick plywood. A layer of fire-retardant polyurethane foam, with a density of $>50 \text{ kg/m}^3$ and a thickness of 83 mm, is bonded to the backrest and upholstered with high-quality fire-retardant fabric, identical to that used for the seat. The upholstery also covers the rear side of the backrest.
- A.1.4.** The armrests are made of wood and upholstered with fire-retardant polyurethane foam, with a density of $>50 \text{ kg/m}^3$, and high-quality fire-retardant fabric.
- A.1.5.** The chair can optionally be fitted with a writing tablet featuring an anti-panic mechanism, positioned on the inner side of the right-hand armrest, as viewed by the user.
- A.1.6.** The chair base is fitted with two (2) fixed glides at the front and two (2) castors at the rear, facilitating easy movement of the chair.
