A.1.1. The frame is manufactured from **Ø26 mm diameter circular-section steel tubes with a thickness of 2 mm**. The tubes are connected to each other by means of **concealed steel connectors**. The rear section is equipped with **two lockable castors**, while the front section is fitted with **two non-slip plastic glides**.

A.1.2. The unit features a worktop manufactured from **three-layer E0.5-class particleboard**, with a thickness of **18 mm**, melamine coating on both sides, and **2 mm-thick ABS edge banding** around the perimeter, available in a variety of colours according to the applicable price list. The worktop can also be finished with **lacquer in various colours**. A **plastic cable outlet grommet** is fitted to the worktop.

A.1.3. The unit can optionally be equipped with:

- An **add-on partition** manufactured from **18 mm-thick three-layer particleboard**, internally upholstered on both sides with **5 mm-thick foam** and externally upholstered with **fabric of choice**.
- A **metal partition**, onto which suitably formed **steel sheet accessories**, such as shelves and other accessories, can be mounted.

A.1.4. The possibility of **fully dismantling** the unit makes it easy to **transport and store**.
