Desk-Chair System

A. Height-Adjustable

- A.1.1.** The base of the writing desk with seat, consisting of the vertical supports, is manufactured from steel profiles measuring $80 \times 40 \times 3$ mm and is connected to the floor-fixing foot. The vertical supports are connected by a height-adjustable crossbar, adjustable in 20 mm increments, measuring $80 \times 40 \times 3$ mm, on which the seat and backrest are supported. The seat is equipped with an automatic folding «**ANTI-PANIC**» system.
- A.1.2.** The base of the writing tablet consists of steel vertical supports measuring $70 \times 30 \times 2$ mm, which are connected by a crossbar measuring $40 \times 20 \times 2$ mm. The two steel vertical supports of the writing tablet are inserted into the corresponding vertical supports of the floor-fixed base and can be connected at multiple height positions in 20 mm increments, allowing adjustment of the writing tablet height.
- A.1.3.** The seat and backrest are manufactured from solid, pressed 12 mm thick plywood, measuring 460×460 mm and 470×350 mm respectively. Their surfaces are finished with a high-durability varnish. Upon request, moulded foamed polyurethane with a thickness of 40 mm may be fitted to the seat and backrest and upholstered with a fabric of choice.
- A.1.4.** The writing tablet is manufactured from 18 mm thick particleboard with a melamine surface finish and features 2 mm thick edge banding around its perimeter, or alternatively a 0.8 mm thick laminate finish.
- A.1.5.** The writing desk with seat is available in one-, two- or three-seat configurations, with two lateral vertical supports.

B. Fixed

- B.1.1.** The base of the writing desk with seat consists of steel vertical supports measuring $80 \times 40 \times 3$ mm, which are connected to the floor-fixing feet. The vertical supports are connected by a crossbar measuring $80 \times 40 \times 3$ mm, on which the seat and backrest are supported, and by a crossbar measuring $40 \times 20 \times 2$ mm, on which the writing tablet is supported. The seat is equipped with an automatic folding «**ANTI-PANIC**» system.
- B.1.2.** The seat and backrest are manufactured from solid, pressed 12 mm thick plywood. Their surfaces are finished with a high-durability varnish. Upon request, moulded foamed polyurethane with a thickness of 40 mm may be fitted and upholstered with a fabric of choice.
- B.1.3.** The writing tablet is manufactured from 18 mm thick particleboard with a melamine surface finish and features 2 mm thick edge banding around its perimeter, or alternatively a 0.8 mm thick laminate finish.
- B.1.4.** The writing desk with seat is available in one-, two- or three-seat configurations, with two lateral vertical supports.
