

Cabinets

A.1. Cabinets with height 800 and 1194 mm

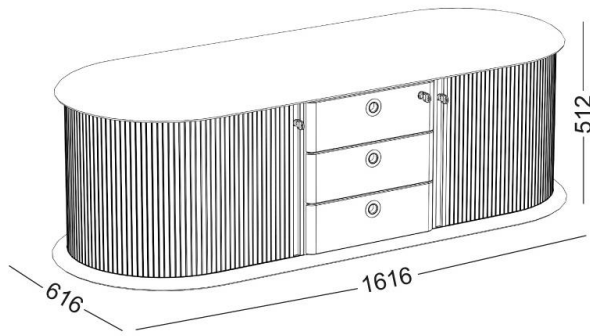

A.1.1. The carcass of the cabinets, except for the shelves and internal partition walls, is manufactured from **MDF with double-sided thermolaminated surface**. The top decorative cover and the base have a thickness of **25 mm**, while the back panel has a thickness of **16 mm**. The internal shelves and partition walls are manufactured from **chipboard with formaldehyde emission class E0.5, 18 mm thick**, with double-sided melamine coating.

A.1.2. The cabinets are fitted with **adjustable levelling feet with a range of 0–10 mm**, which are adjusted from inside the cabinet, allowing precise adjustment and levelling of the furniture on the floor.

A.1.3. In the central section, the cabinets feature **two (2) hinged doors with a lock**, while the two side sections, on the left and right, are fitted with **flexible roll-top doors made of polypropylene (PP)**. Each side section is equipped with an **independent lock**, allowing separate locking and secure storage of its contents.

A.2. Cabinets with height 512 mm

A.2.1. The carcass of the cabinets, except for the shelves and internal partition walls, is manufactured from **MDF with double-sided thermolaminated surface**. The top decorative cover and the base have a thickness of **25 mm**, while the back panel has a thickness of **16 mm**. The internal shelves and partition walls are manufactured from **chipboard with formaldehyde emission class E0.5, 18 mm thick**, with double-sided melamine coating.

A.2.2. The cabinets are fitted with **adjustable levelling feet with a range of 0–10 mm**, which are adjusted from inside the cabinet, allowing precise adjustment and levelling of the furniture on the floor.

A.2.3. In the central section, the cabinets feature **three (3) metal drawers, 0.9 mm thick, with a security lock**, while the two side sections, on the left and right, are fitted with **flexible roll-top doors made of polypropylene (PP)**. Each side section is equipped with an **independent lock**, allowing separate locking and secure storage of its contents.

A.2.4. The drawers are suitably designed to **fully cover the drawer slides**, ensuring a clean aesthetic appearance, protection of the mechanisms and safe use.

A.2.5. The drawers are fitted with **full-extension slides (100%)**, providing complete and easy access to their interior, as well as a **Soft Close system** for smooth, controlled and silent closing.
