Visitor / Collaboration Chair

- A.1.1.** The frame is made of circular-section steel tubing, with a diameter of 22 mm and a thickness of 2 mm, formed into a four-leg frame. The frame construction ensures stability and durability during use.
- A.1.2.** The seat and backrest are made of laminated beechwood sheets, with a total seat thickness of 12 mm, and are upholstered in the fabric or leatherette of choice from the **DROMEAS** colour chart. The seat is fitted with a moulded polyurethane layer, providing enhanced comfort during use.
- A.1.3.** The armrests are covered with soft black polyurethane, providing comfortable and ergonomic support for the arms.
- A.1.4.** The chair can be stacked up to **five (5) units**, facilitating storage and saving space.
- A.1.5.** The chair is equipped with non-slip glides suitable for both hard and soft floor surfaces, ensuring stability and reducing sliding during use.

Product certificates:

- EN 16139:2013/AC:2013** - Furniture — Strength, durability and safety — Requirements for non-domestic seating.
- EN 1728:2012/AC:2013** - Furniture — Seating — Test methods for the determination of strength and durability.
- EN 1022:2018** - Furniture — Seating — Determination of stability.
