Visitor Chair

- A.1.1.** The chair frame is made of circular-section steel rod, with a diameter of 22 mm and a thickness of 2 mm, suitably curved and welded to form the supporting frame of the chair.
- A.1.2.** The frame is available either chrome-plated or finished with electrostatic powder coating and is equipped with four (4) non-slip glides made of moulded thermoplastic material, ensuring stability during use.
- A.1.3.** The seat and backrest are made of moulded thermoplastic material (PP) and are snap-fitted onto the frame. A protective cover is fitted to the underside of the seat, contributing to the overall appearance of the chair and facilitating the stacking process.
- A.1.4.** The chairs are **stackable** and can be stacked up to four **(4)** units, facilitating storage and saving space.

Product Certifications:
