### Auditorium Chair

- A.1.1.** The chair frame is made of circular-section steel rod, with a diameter of 11 mm, suitably curved and welded to form the supporting frame of the chair.
- A.1.2.** The frame is chrome-plated and equipped with four (4) non-slip glides made of moulded thermoplastic material, ensuring stability during use.
- A.1.3.** The seat and backrest are made of moulded thermoplastic material (PP) and are snap-fitted onto the frame. A protective cover is fitted to the underside of the seat, contributing to the overall appearance of the chair and facilitating the stacking process.
- A.1.4.** The seat and backrest can optionally be fitted with a 20 mm thick polyurethane foam cushion, upholstered in the fabric or leatherette of choice according to the DROMEAS price list, providing additional comfort during use.
- A.1.5.** Special plastic connectors fitted to the frame allow the chairs to be linked together side by side in a continuous row.
- A.1.6.** The chairs are **stackable**, facilitating storage and saving space.

### Product certificates:

**EN 1022:2005** - Furniture — Seating — Determination of stability.

**EN 16139:2013** - Furniture — Strength, durability and safety — Requirements for non-domestic seating.
